## (B.) STATE FINANCE.

NOTE.—In respect of New South Wales the Consolidated Revenue Fund, the Unemployment Relief Fund, the Social Services Fund and Business Undertakings—Railways, Tramways and Omnibuses, Sydney Harbour Trust Section of Maritime Services Board, and Road Transport and Traffic Fund—included in the Annual Budget Papers are represented in the following tables. Deductions have been made from the Budget figures, however, in order to obviate duplications caused by inter-fund payments and to maintain uniformity from year to year in the presentation of statistics. A deduction of £856,873 has thus been made from the Budget Revenue total of £60,752,444, and of £1,290,261 from the Expenditure total of £61,609,297. Particulars for other States are restricted to the transactions of the Consolidated Revenue Fund and have not been adjusted.

NOTE.—The unions covered by the returns represent 54 per cent. of the total membership of unions, and relate to between 20 and 25 per cent. of all wage and salary earners. The value of the percentages of unemployment derived from Trade Union returns is in the indication they give of the trend of unemployment among trade unionists as reported by secretaries of Trade Unions.

(a) The quarterly figures show the number of persons who were out of work for three days or more during a specified week in each quarter: they do not include persons out of work through strikes or lockouts, except those outside the industry concerned who are indirectly affected. The annual figures represent the average of the four quarters. (b) A more extended table of percentages will be found on page 73. (c) Peak of unemployment.

NOTE.—For some States the returns are a more representative sample than for others. The table above, therefore, should not be read as indicating the relative degree of unemployment among trade unionists in the individual States, but as an indication of trend of unemployment as reported by secretaries of Trade Unions.

(a) See notes to table on page 54. (b) Peak of unemployment. (c) Coal-mining employees out of work owing to the industrial dispute were excluded from the tabulation, but persons in other industries indirectly unemployed owing to the dispute were included.

## Section VII.—Retail Price Index-Numbers—Cost of Food, Groceries, Housing, etc.

Note.—The index-numbers on this and the next three pages are related to the post-war period 1923-27. The weighted average prices for these five years for the Six Capitals are made equal to 1,000. In the combined tables the rent of 4 and 5 roomed houses only is taken into account.

The "B" Series represents the Food and Housing portion of the "All Items" ("C" Series) Index published on page 63.

### Retail Price Index-Numbers.(a)—Capital Cities.

("B" Series.)

(Base in each Section : Weighted Average of Six Capital Cities, 1923-27=1,000.)

Note.—The index-numbers given in the separate parts of the table cannot be compared with each other in order to show the relative cost of housing, and food and groceries, since the cost in 1923-27 in each group or combination is made equal to 1,000.

(a) Weighted Average for the five towns. (b) Charters Towers. (c) Warwick. (d) Not included in above weighted averages except for year 1936. (e) New series from 1938. The drop in 1938 was due to revision of sample of houses used for the calculation of average rentals in order to make it more comparable with that of the capital cities and other large towns throughout Australia. To secure comparison with "B" Series index-numbers for Canberra for periods prior to the September quarter 1938, the new series index-numbers should be multiplied by 1.090.

(a) Owing to the revisions resulting from the 1936 Conference of Statisticians, certain slight breaks of continuity appear after the June, 1936, quarter in the group index-numbers for Rent for certain towns. The revision of the whole system has been so arranged, however, that this break does not extend to the group index-numbers for the Six Capital Cities, or to the index-numbers for all groups combined for individual towns. (b) Five Towns.

NOTE.—The index of wholesale prices above was first computed in 1912 and relates chiefly to basic materials and foods weighted in accordance with consumption in the years immediately preceding that date. Neither the component items nor the weighting have been varied. Consequently the index is a measure of changes in wholesale price levels based on usages which have altered substantially since the period on which the weighting was determined. As such it is useful as an indication of long-term trends over the past 80 years which it covers, on the assumption that the relative importance of component items remained constant. But it no longer serves as a measure of price variations from month to month or from year to year of commodities weighted in accordance with present-day consumption. Reference to a description of the index published in the annual *Labour Report* will indicate that animal fodders preponderate in the "Agricultural Produce" group, while "Building Materials" include little besides imputed timber. In other groups, some principal items have increased in consumption while others have decreased. Comparisons of wholesale price index-numbers over the past 10 years are shown in tables which follow.

## WHOLESALE PRICE INDEX-NUMBERS.

## BASIC MATERIALS AND FOODSTUFFS.

Following a conference of Statisticians in 1930 an index has been computed from new data on prices and consumption. Both in contents and method of computation it differs from the Melbourne Index of Wholesale Prices. The price quotations have in the main been obtained directly from manufacturers and dealers, and, with a few important exceptions, from Melbourne sources. Apart from home-produced building materials, coal and one or two minor commodities, however, the price movements may be taken as representative of fluctuations in wholesale prices of basic materials in most Australian markets. The weighting system adopted is based on average annual consumption during the years 1928-29 to 1934-35 inclusive.

## PRIMARY PRODUCTION PRICE INDEX-NUMBERS.

The annual index-numbers in the following table have been recomputed to the base 1928-29 = 1,000 from the revised series published in *Production Bulletin* No. 34. They are based in general on prices realized in the principal markets of Australia.

The monthly index-numbers (based on the nearest equivalent wholesale quotations) are intended progressively to forecast the point which the annual index-numbers will eventually reach, and to provide a preliminary figure for the latest full year pending the completion of the annual census of production. The preliminary index-numbers will be revised as each production census is completed.

## EXPORT PRICE INDEX-NUMBERS.

These index-numbers are compiled from the prices of 20 commodities which constitute about 85 per cent. of all exports. The prices are multiplied by the average quantities exported during a fairly recent and representative period.

NOTE.—While the index-numbers above indicate satisfactorily the general trend of the market, they take no account of the relative quantities actually sold at the different prices ruling in each month and consequently do not give an adequate indication of the significance of the price movements as they actually affected current sales. This is shown more accurately by the Export Price Index (Changing Base), published in the *Monthly Review of Business Statistics* and in the computation of which the "quantity-multipliers" are changed each month.

(a) Index of nominal weekly wage rates divided by "C" Series index of retail prices.

(b) Taken back from true base (November, 1914 = 1,000) by means of the Food and Rent (All Houses) Index.

† The index-numbers given in the separate columns of the table cannot be compared with each other in order to show, for example, the relative cost of housing, and food and groceries, since the cost in 1911 in each group or combination of groups is made equal to 1,000.
